

### DISCLAIMER

This webinar is not to be used instead of going to a competent doctor, I do not directly nor indirectly dispense medical advice or prescribe in any way alternative treatment for sickness (It is illegal to do so).

In the event you use this information, which is only of historical value, you are prescribing for yourself, which is still your constitutional right. I assume no responsibility.

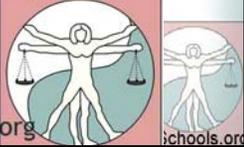

I am independent in my attempt to educate the public. Although I do endorse some top quality products, I receive no financial support from any health or herb product company for producing this information.

I also believe that it is a crime that we have to pussyfoot around the truth because there is a law that says that I cannot declare what changing your lifestyle and diet can do for your health. I believe in this great country and will do my best to try to obey its laws even if I strongly disagree with them.

Herbs, supplements and diet work slowly, I suggest that you do not go off any medication without the help of a doctor.

I say this not only because it is the law, but because I BELIEVE STOPPING MEDICATION WITHOUT THE ADVICE AND GUIDANCE OF A DOCTOR IS UNWISE AND DANGEROUS.

If I would like to make healthier changes in my diet and my doctor was not willing to help me while I worked with a natural health practitioner, I suggest you find a doctor who values and respects his patient's wishes and rights and fire the doctor who would not!

### Notice Each Characteristic

NaturalHealthSchools.org

### Benefit of Making Tea

- Taste stimulates
- Releases components in herbs
- Gets in the blood stream under tongue
- More easily absorbed
- Good for those of poor digestion

Can also soak feet

NaturalHealthSchools.org

### Bolus

Use Coconut oil for bolus because it solidifies easily as well as melts at body temperature to disburse the herbs

Melt in a slow cooker at the lowest setting. Stir in herbs until it starts to become formable. Put on strips of wax paper and smooth and roll into a shape of a bullet about the pinkie width of the person who is getting the bolus inserted. Put in the refrigerator to get stiff enough to insert.

Bolus are usually used rectally or vaginally. Be careful with what herbs you use because the rectum and vagina has tender mucosal lining.
