---

---

---

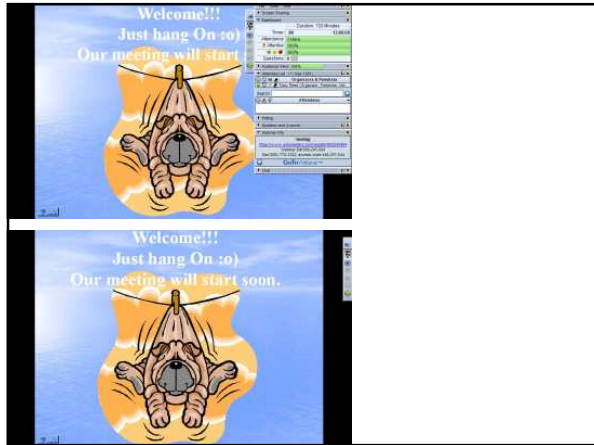

---

---

---

---

---

---

11 And God said, Let the earth bring forth grass, the herb yielding seed, and the fruit tree yielding fruit after his kind, whose seed is in itself, upon the earth: and it was so.

12 And the earth brought forth grass, and herb yielding seed after his kind, and the tree yielding fruit, whose seed was in itself, after his kind: and God saw that it was good.

Gen 1:12

---

---

---

---

---

---

---

---

19 Every beast, every creeping thing, and every fowl, *and* whatsoever creepeth upon the earth, after their kinds, went forth out of the ark.

Gen 8:19

---

---

---

---

---

---

---

---

**GMO, Genetically Engineered, or Bio-engineered**

- An organism that is created by overcoming natural boundaries which prevents species from crossing
- Normally all plants and animals have a self-regulating mechanism which prevents invasion of foreign DNA and prevents mutation

---

---

---

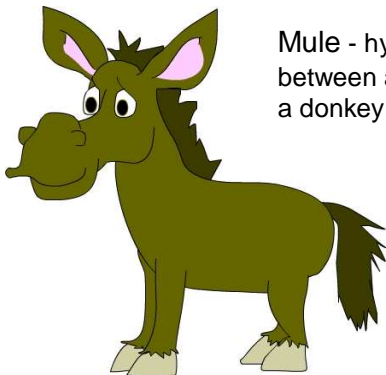

---

---

---

---

---

---

## DNA of Virus and Bacteria

---

---

---

---

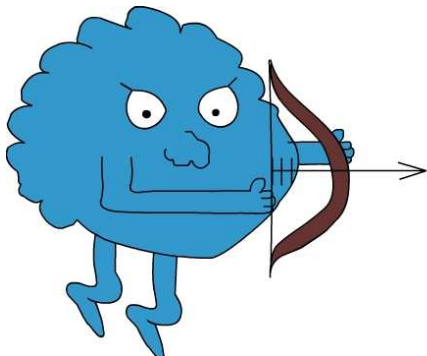

---

---

---

---

## Antibiotic Marker

---

---

---

---

---

---

---

---

Certainly the widely used cauliflower mosaic virus [CaMV] is a potentially dangerous gene. It is a pararetrovirus meaning that it multiplies by making DNA from RNA messages. It is very similar to the Hepatitis B virus and related to HIV."

Dr. Joseph Cummins, Professor Emeritus in genetics from the University of West-Ontario, Canada, 1994

---

---

## Conspiracy

- An agreement between two or more natural persons to break the law at some time in the future
- A plot to overthrow, monopolize or take control

---

---

---

---

---

---

---

---

### How can this have gotten this far?

- 1980 Diamond Vs Chakrabarty ruled biological life can be patented.
- Patent gene
- Patent follows the gene... So if the gene is found to have cross pollinate the tainted crop is the property of the patent holder. If the gene transfers to an animal the animal is then the property of the patent holder
- Patent of seeds never meant to be used. Ex Monsanto's has over 11,000 patented seeds.
- Monsanto's restricts research on their patented plants
- GMO food does not have to be labeled

---

---

---

---

---

---

---

---

### Buying up the competition

- Monsanto's has spent 8 billion dollars buying up small seed companies
- Has actively tested surrounding farms for their gene...if found they demand the crop be destroyed and the farmer is made to pay a fine EVEN if it was caused by accidental contamination or cross pollination
- Over 100,000,00 acres are not planted with GMO corn, cotton, soybeans and canola

---

---

---

---

---

---

---

---

### The World's Top 10 Seed Companies US \$ millions 2006 seed sales

1. Monsanto (US)\$4,0282.
2. Dupont (US)\$2,7813.
3. Syngenta (Switzerland)\$1,7434.
4. Groupe Limagrain (France)\$1,0355.
5. Land O' Lakes (US)\$7566.
6. KWS AG (Germany)\$6157.
7. Bayer Crop Science (Germany)\$4308.
8. Delta & Pine Land (US) (acquisition by Monsanto pending)\$4189
9. Sakata (Japan)\$40110.
10. DLF-Trifolium (Denmark)\$352.

Name	Government Affiliation	Monsanto's Affiliation	Comments
Michael Taylor	Presently FDA	Employee	
Linda Fisher	Deputy Administrator for EPA	Executive Vice President	Has volleyed back and forth between the two at least 3 separate times.
Ann Veneman	Secretary of Agriculture	Board of Directors of Calgene Co.	Calgene Co was purchased by Monsanto's
Michael Friedman	Former Acting Commissioner for FDA	Senior VP of GD Searle	Division of Monsanto's
William Ruckelshaus	Chief Administrator of EPA	Board of Directors of Monsanto's	
Donald Rumsfeld	Former Secretary of State	Board of Directors for Monsanto's	
John Ashcroft	Former U.S. Senate from Missouri	Received largest campaign contribution from Monsanto's	Submitted legislation to uphold gene patents
George W. Bush	Soon to be former President of the USA. :o)		Signed a bill allocating THE most money ever for subsidizing GMO crops.

---

---

---

---

---

---

---

---

---

---

---

---

**Trouble with only 4 companies owning ALL the seeds in the World**

- They control the food. Since the terminator gene kills the seeds, you will have to buy new seeds every year from them
- Limited variety, fosters larger amount of certain insects
- Limited variety, opens up for plaques
- Ethanol made of Corn.... Corn owned by these companies

---

---

---

---

---

---

---

---

---

---

---

---

**Scarier Future**

- Vaccines in foods, medicine grown on foods

---

---
